Laboratory furniture:
EUROMAX®, EUROMINI®, INOVA®

МеталлДизайн

For 10 years now specialists of the laboratory furniture factory "METALLDESIGN" study specific features and implement projects of providing laboratory furniture to laboratories of fuel and energy complex, metallurgy, medicine, food, environment and education.

We design furniture, creating new models focused on different needs of enterprises in Russia and countries near and far abroad.

THOUGHT

Research and development

Since the foundation of the laboratory furniture factory "METALLDESIDN", its specialists study features of using the laboratory furniture and fume hoods in laboratories of fuel and energy complex, metallurgy, medicine, food, environment and education.

CONCEPT

Design and Test

We design furniture, creating new models focused on different needs of enterprises in Russia and countries near and far abroad.

“METALLDESIGN” factory keeps experimental production workshops, where new products are designed, manufactured and tested.

We also test new furniture samples in sectoral research institutes and leading enterprises of Russia.

REALITY

Serial production and modern technology

We use the most advanced software and the most advanced technologies for the production of metal laboratory furniture. We carefully monitor the quality of products at each stage of production.

QUALITY

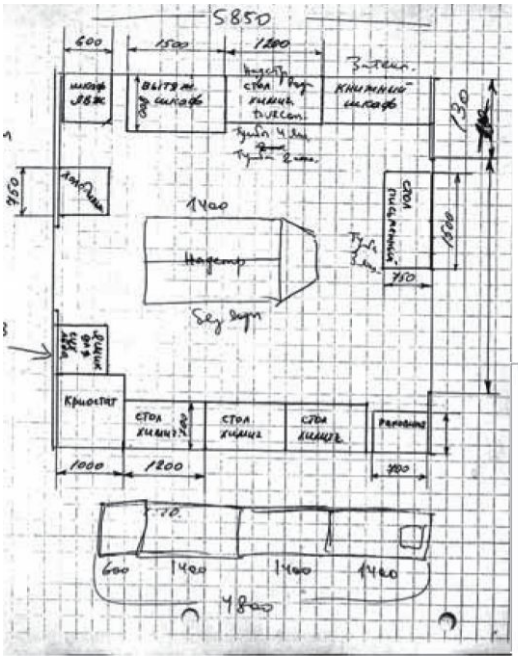
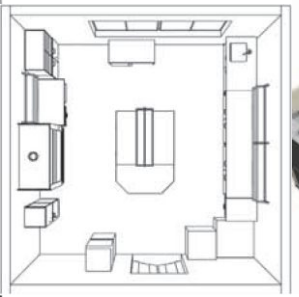
Due to numerous tests and trials, we can monitor the quality of our products and work on improving it.

The Quality Management System of the factory is certified according to international standard ISO 9001:2008 and accredit edin the US, UK, Germany and France.

DESIGN PROCESS

We make the interior design of a future laboratory as two-dimensional drawings and three-dimensional graphics, which allows the customer to consider all the features of ergonomics, functionality, comfort, to optimize the cost of his order and to take aboard the prospects of the enterprise progress.





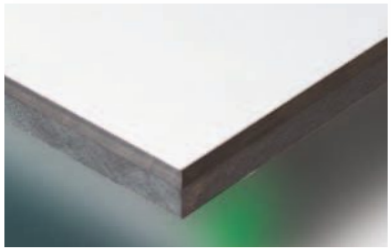
FURNITURE ASSEMBLY AT THE CUSTOMER'S SITE

Assembly and connection of the furniture and fume hoods to utilities must be performed by qualified personnel only.

We offer services for assembly of laboratory furniture in the customer's site; as well as perform training of certified specialists.

Table Tops

Laminated plate :
Resistant to dilute acids, alkalies and organic solvents for short periods of time.
Withstands short-term temperature exposureup to 170° C.



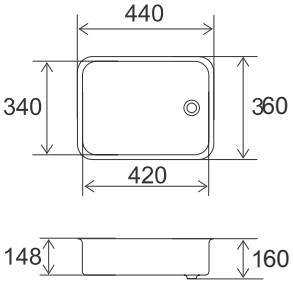
Laminated plastic LabGrade:
Chemically stable, non-hygroscopic .
Withstands temperature exposure up to 200° C.

Epoxy composite Durcon:
Particularly stable when in contact with most chemicals, acids, alkalies, solvents. Non-hygroscopic.
Does not support combustion.
Withstands temperature exposure up to 300° C.

Porcelain tiles (artificial stone):
Manufactured on the basis of quartz and epoxy resin.
Particularly stable when in contact with most chemicals.
Particularly stable under prolonged thermal contact.
Does not support combustion.
Withstands temperature exposure up to 300° C.

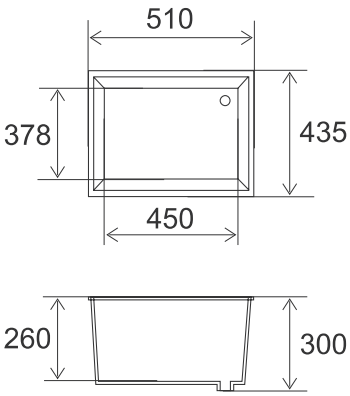
WASHERS AND SINKS

Stainless steel:
Comes complete with LabGrade tabletop



Durconsink:
Comes complete with Durcon and LabGrade tabletops.

Durcon:
Comes complete with Durcon and LabGrade tabletops.



Polypropylene sink:
Comes complete with Laminate, Ceramic, Porcelain, LabGrade tabletops.

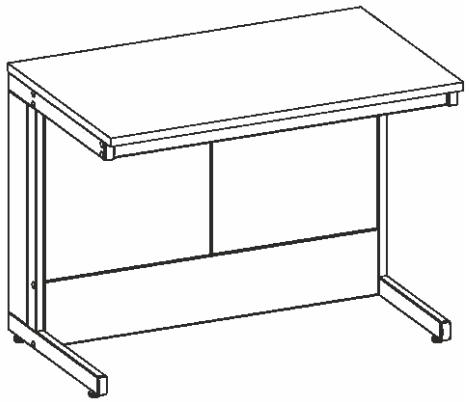
When designing EuroMax furniture series, we hoped that every component would comply not only with traditional requirements of Russian laboratories, but also with various international standards. This is why we assert that EuroMax is the laboratory furniture for the most exacting users.

The following requirements were used in the design:
BSEN 13150, BS 3202, DIN 12916,12918,12920

Lab Side Tables

Basic assembly for chemical lab tables in this series is the following:
- Rugged metal frame, powder coated;
- Height of 900 and 750 mm;
- Six different materials of table tops;
- Maximum table load up to 300 kg;
- Adjustable supports and removable front screens for access to services;
- Multisectional tables available;
- Capability of mounting suspended pedestals, technological racks with shelves and power supply, cocks for gas or water with a sink, and a titration rack.

Lab Side Tables



Lower screens hide water, gas, electric service lines. Screens are opened with plastic keys (universal for all side and island tables) and can be easily removed, providing access for servicing

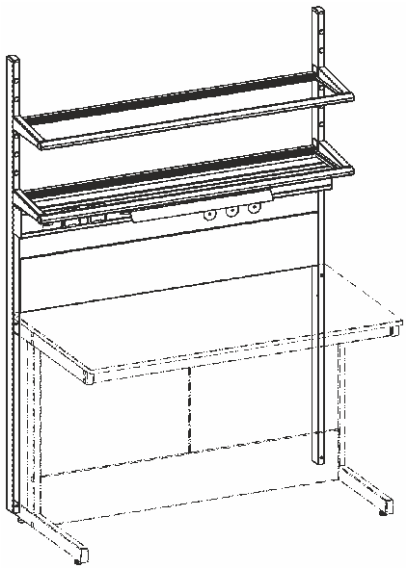
	Durcon with collar	3560x764x900	311153
	Ceramic granite	3546x750x900	311163
Three-sectionside table H=900mm L=4146mm	Grey Laminate	4146x750x900	311383
	LabGrade	4146x750x900	311393
	Durcon	4146x750x900	311343
	Durcon with collar	4160x764x900	311353
	Ceramic granite	4146x750x900	311363

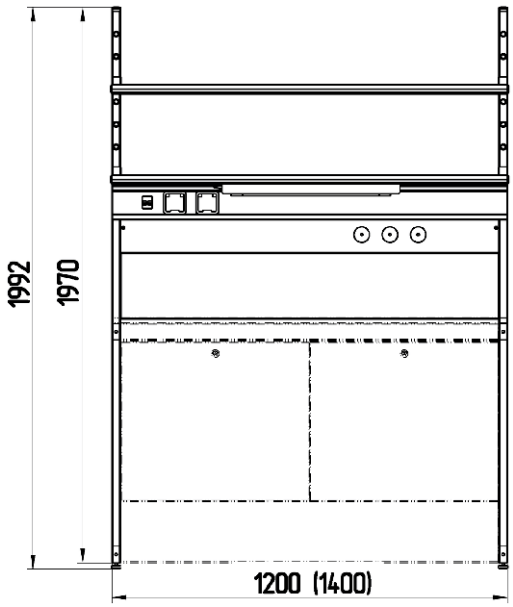
Technological racks

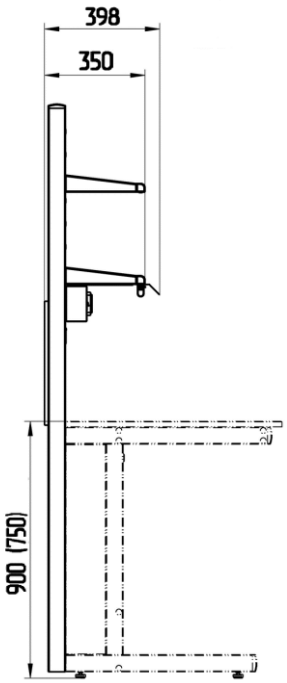
- Rugged metal frame, powder coated;
- Shelves for glassware made of tempered glass with aluminum profile;
- Capability of rearrangement of shelves (7 levels for tables with height of 900mmand 9 levels for tables with height of 750mm);
- Cable duct with sockets and automatic shutdown, fluorescent lights;
- Metal duct for installation of cocks for water, gas and air.

Technological racks



Item Name	Dimensions, mm	Code
Technological rack for a side table H=750mm	1200x398x1992	342000
	1400x398x1992	342200
Technological rack for a side table H=900mm	1200x398x1992	342100
	1400x398x1992	342300



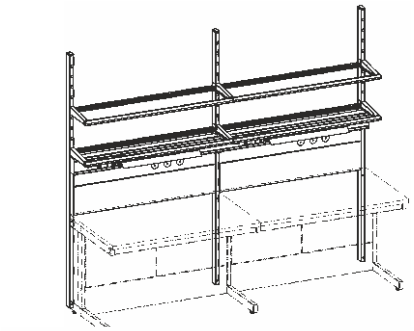


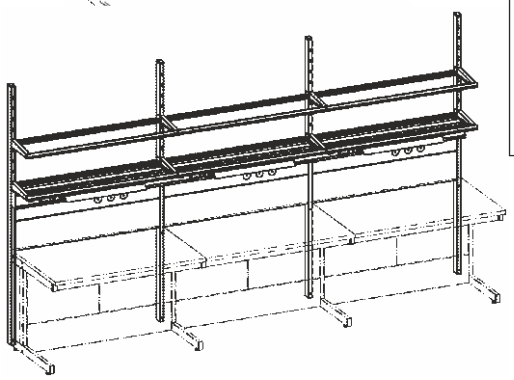
Note!

- A technological rack can hold up to three cocks.
One cock for water with a drainage sink and two cocks, gas or air, in various combinations.
- Technological racks of appropriate height only can be mounted on tables with height of 750mm and 900mm.
- Without technological racks only service racks, pedestals and titration racks can be mounted on tables.
- Cocks can be set only with the use of technological racks.

Technological racks

Multisection technological racks





Item Name	Table height	Dimensions, mm	Code
Technological rack for two-sectionside table	H=750mm	2370x398x1992	342002
		2770x398x1992	342202

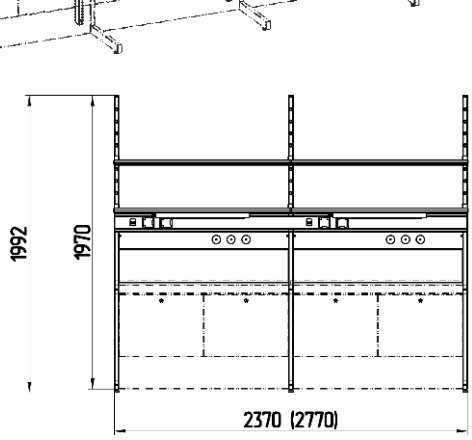
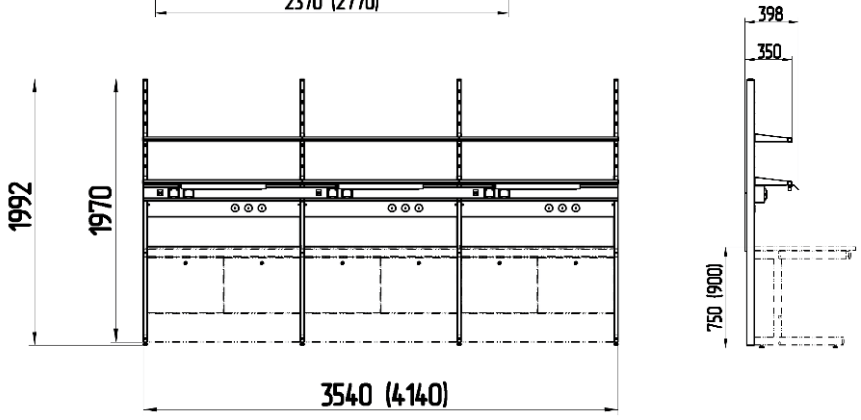
		4140x398x1992	342203
	H=900mm	3540x398x1992	342103
		4140x398x1992	342303





Note!

- A technological rack can hold up to three cocks.
One cock for water with a drainage sink and two cocks, gas or air, in various combinations.
- Technological racks of appropriate height only can be mounted on tables of 750mm and 900mm height.
- Without technological racks only service racks and pedestals can be mounted on tables.
- Cocks can be set only with the use of technological racks.

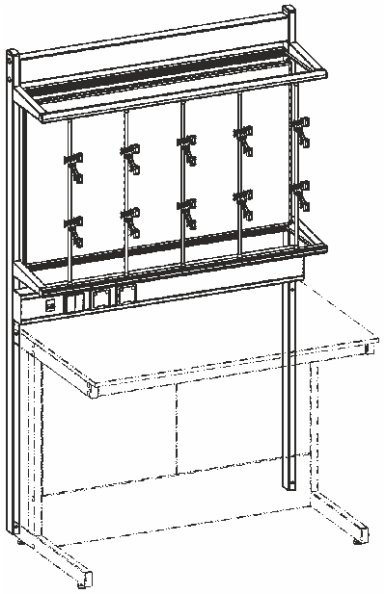
Laboratory of Tyumen State University
Operation of "METALLDESIGN" fume hoods since 2004

Knauf Laboratory
Usage of furniture "METALLDESIGN" since 2003

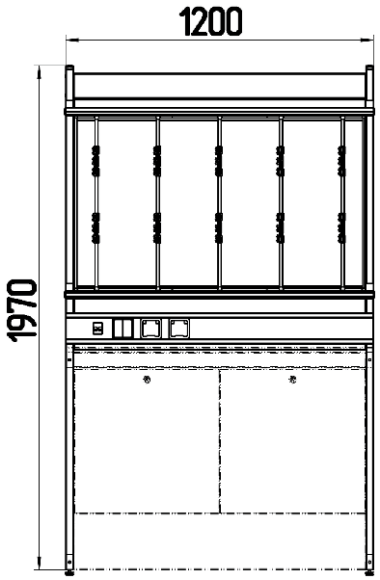
Titration rack

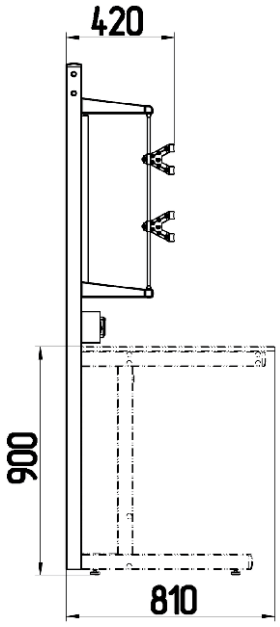
- Metal frame, powder coated;
- Shelf for reagents;
- Screen with frosted glass, illuminated with fluorescent lamps;
- Five stands of stainless steel with ten polypropylene clamps for burettes;
- Duct with two sockets, automatic power and illumination shutdown.

Titration rack



Titration rack complete with a side table is designed to perform various analyses by direct or back titration.





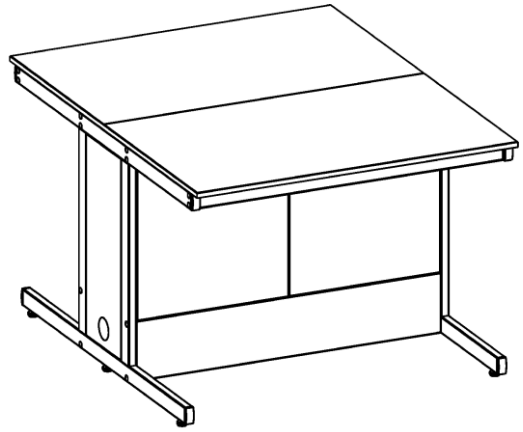
Item Name	Dimensions, mm	Code
Titration rack	1200x420x1992	342900

Island tables

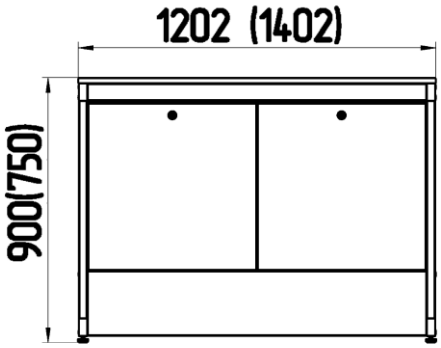
- Rugged metal frame, powder coated, with height of 900 mm and 750 mm;
- Five different materials of table tops;
- Maximum load on one table section up to 500 kg;
- Adjustable supports s and removable front screens for access to services;
- Multi sectional tables available;
- Capability of mounting suspended pedestals, technological racks, racks with electric sockets, cocks for gas or water with sink.

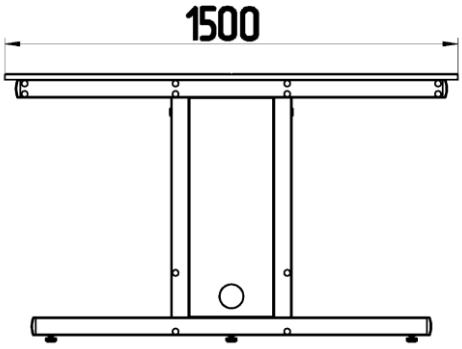
Island tables

Island tables



All island tables have special plugs, located in the section supports (both right and left), designed to supply the necessary services.





750 mm height

Item Name	Table top	Dimensions, mm	Code

	Durcon with collar	1514x807x750	317250
	Ceramic granite	1500x800x750	317260
Standard end table L= 900	Grey Laminate	1500x800x900	317180
	LabGrade	1500x800x900	317190
	Durcon	1500x800x900	317140
	Durcon with collar	1514x807x900	317150
	Ceramic granite	1500x800x900	317160

Note! Only a pedestal with three drawers of EuroMax series can be suspended to a table with height of 750mm.

Pedestals

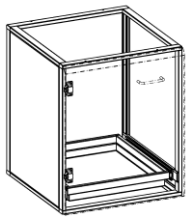
- Rugged metal frame , powder painted;
- Pedestal doors are filled with sound-absorbing material;
- Capability of mounting pedestals in tables in any combination;
- Individual pedestals for lengthy chemical glassware;
- Plastic inserts in drawers with compartments for small items.

Pedestals

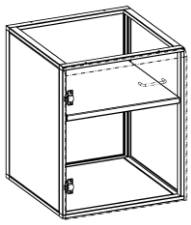
Reservoir pedestal and a pedestal with 4 drawers "LUX" feature fully draw-out guides.

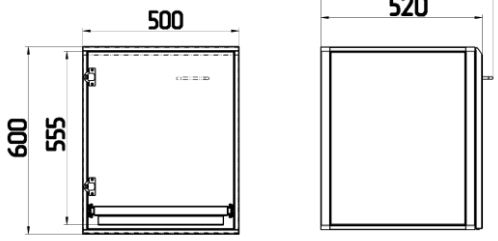
Pedestals with drawers can not only be suspended on EuroMax tables series, but can also be used as a standalone product, due to the rollers and the upper lids with handles.

Reservoir pedestal

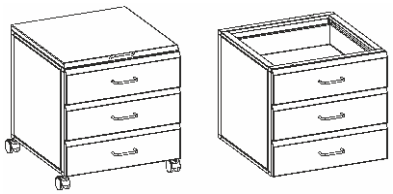


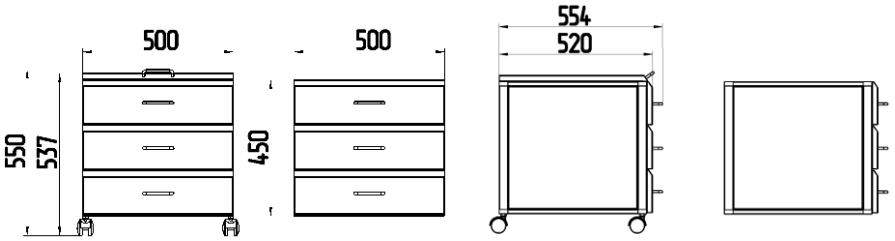
Pedestal with a shelf





Pedestal with 3 drawers





Pedestal with 4 drawers

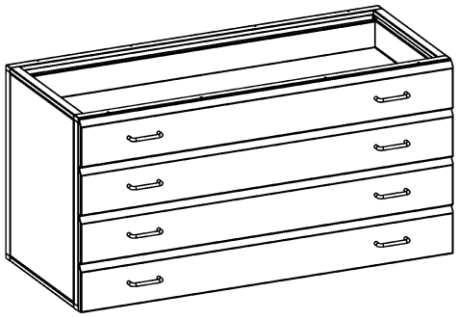
Pedestal with 4 drawers (rolling- suspended)	500x520x600(700)	332900
Pedestal with 4 drawers LUX (rolling- suspended)	500x520x600(700)	332950

Note!

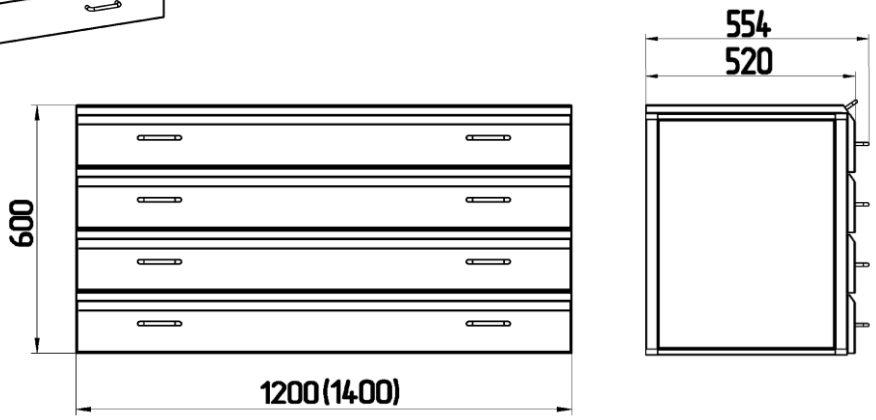
Pedestals with height of 600mm are designed to be suspended on tables with height of 900mm. Two-section pedestals are designed to be suspended on tables of corresponding length.

Pedestals

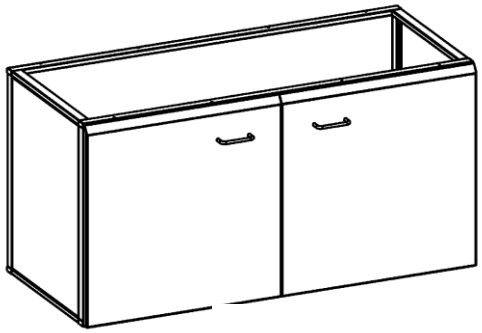
Two-section pedestal with four drawers



Two-section pedestals are equipped with fully draw-out guides.
Maximum load for each drawer 20kg.



Two-section pedestal with a shelf



All pedestals with EuroMax door series are equipped with reinforced door butts.

Cocks and plumbing equipment for side and island racks

Item Name			Code
Water cock for **side racks** Durcon sink Syphon Sewage pipe with length of 500 mm			348240
Water cock for **side racks** Polypropylene sink Syphon Sewage pipe with length of 500 mm			348200
Water cock for **island racks** Durcon sink Syphon Sewage pipe of 500 mm length			348241
Water cock for **island racks** Polypropylene sink Syphon Sewage pipe of 500 mm length			348201
Gas cock			348100
Compressed air cock			348300

Upon customer's request, cocks for other gases can be supplied.

Accessories

Wall dryer

The dryer can be secured on a wall or on technological racks of island tables. There is a connector on the lower part of a frame for connecting the hose to drain water drippings from glassware.

Material of frame and holders- ABS plastic.
Rear wall material - steel, powder painted.
Number of holders - 25 pcs.
Maximum load on holders -1 kg.
Product weight - 5 kg.

Note! When using a dryer avoid contact of frame and holders with organic solvents.

Item Name	Dimensions, mm	Code

Usage of "METALLDESIGN" furniture since 2005

Technological racks with washers

- Rugged metal frame, powder painted;
- Two different table top materials;
- Different arrangement of a washer on table top: right, left, double;
- Maximum table load up to 200kg;
- Adjustable supports;
- Capability of the splash screen mounting;
- Capability of eye washers mounting;
- Availability of pedestals;
- End tables with table top dimensions 1500x800;
- The service compartment takes the entire volume under the washer.

Tables with washers

LLC “METALLDESIGN” interior design

Table for sample preparation with ventilation

- Rugged metal frame, powder coated;
- Two table tops, stainless steel, 1.5 mm thick;
- Rack with a shelf and fluorescent lamp;
- Small-sized exhaust system;
- Opening in a table top for removal of samples and dustre sidues captured by the cyclone, closed bya lid;
- Cyclone with a removable container to collect residues of dust and samples;
- Maximum table load up to 300 kg;
- Adjustable supports

Table for sample preparation with ventilation

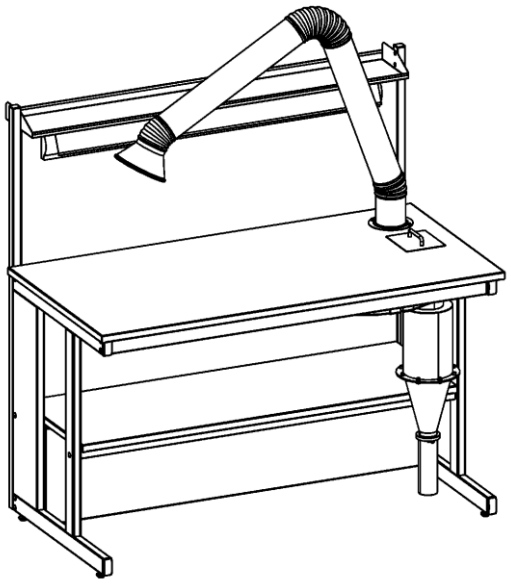

Table is designed for preparation of dry samples.

Movable hood sleeve ensures comfortable work conditions for laboratory assistants.

Powerful fluorescent lights perfectly illuminate the work area.

LLC "Gipronikel Institute"
Usage of "METALLDESIGN" furniture since 2004

Composition of accessibility, mobility and European quality

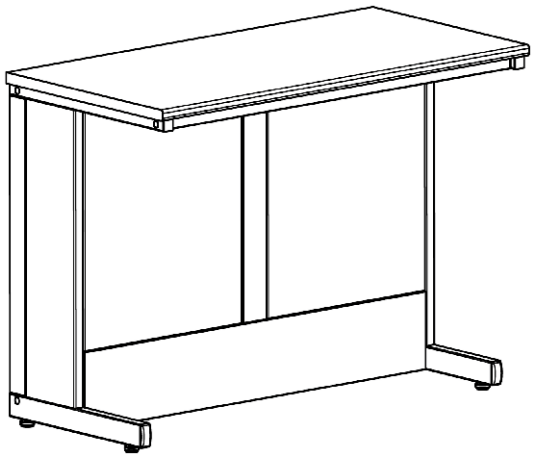
The basis of our design of tables comprises the opportunity to form a variety of configurations to successfully complement the laboratory rooms with any area and ceiling height. EuroMini Furniture can supplement or be supplemented with EuroMax furniture series, which is targeted at the most demanding customers. EuroMini furniture is versatile and affordable.

Products meet the standards of GOST 16371-93, GOST 19917-93, GOST 51121-97

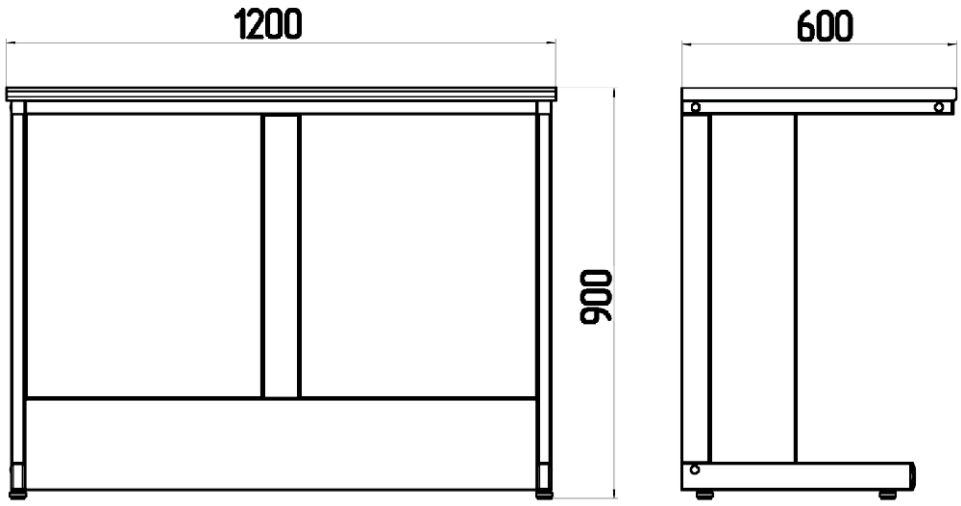
Side tables

Basic assembly for chemical lab tables in this series is the following:
- Rugged metal frame, powder coated;
- Six different materials of table tops with dimensions of1200x600 mm and four variants with dimensions 600x600 mm;
- Maximum table load up to 180 kg;
- Adjustable supports and removable front screens for access to services;
- Capability of mounting pedestals, racks with shelves, ducts with power sockets; cocks for gas or water with sink.

Side tables



Side table is designed for conducting physical or chemical analyses using appropriate instruments (pH tester, spectrophotometer, photocolorimeter, etc.)



Item Name	Table top	Dimensions, mm	Code
